

# E5CC/E5EC - B Series

## Digital Temperature Controller

Fast and precise regulation: 50 ms sampling loop period time

High visibility thanks to Double display

Less wiring due to cross over wiring

Easy Wiring due to Push-In Plus technology

Save Space with a Compact Body design and Horizontal Group Mounting

PC programming port on the side

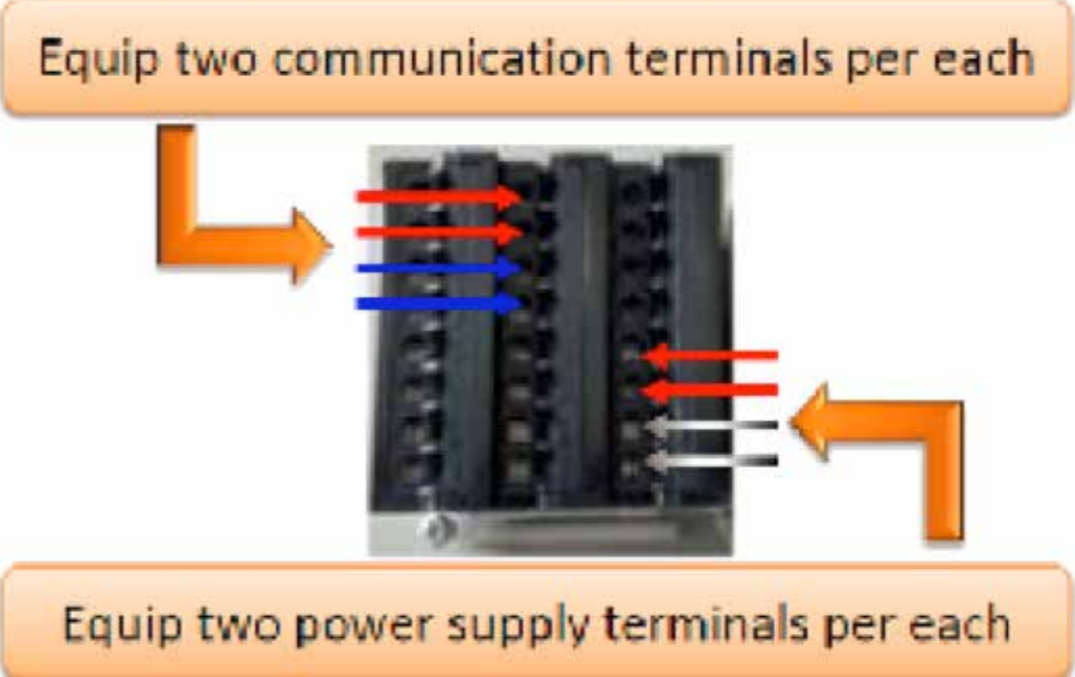

# E5CC/E5EC - B Series Product Highlights

## Easy set-up, quick and intuitive operation

CX-thermo special setup software. Effectively reduces work from setup to adjustment and operation.

## Reduce Crossover Wiring

Double terminals for "Power supply" and "communication" make easier wiring in case of multiple units installation

## High visibility

Big white characters on a black background achieve superior visibility.

## Push-in Plus Technology

For Easy Wiring  
Just Insert Wires: No Tools Required

## Space saving

Compact Body with 60 mm in depth and Lower heat dissipation allowing possibility for side by side mounting, makes the Controller applicable in tight spaces.

# E5CC/E5EC - B Series Applications

Food & Commodity

Very compact cabinet/housing like fermentation controller for wine tank.

Food & Commodity

Small ovens/Incubator and furnaces where reduced installation space is key.

# E5CC/E5EC - B Series

## Additional features:

- Fast and precise regulation: 50 ms sampling loop period time
- Easy to set up, and operate intuitively via CX-Thermo without power supply
- Best contrast display using white LCD technology which is visible from a far distance and from any angle
- Useful alarm and diagnosis functions for secure operation
- Practical timer and logic operation functions eliminating the need of a PLC
- Additional models with different features (Serial communication RS485, Heater failure detection, digital event inputs for control device functionality via external push-button)
